

Master of Science in Biomedical Sciences Academic Year 2017-2018

Textbook List for 2017-2018

WMed faculty embrace the advantages that digital media provides and have selected Vital Source as the online digital textbook provider for our students. Vital Source permits course instructors to highlight and annotate the digital text and allows both faculty and students to share notes – all as a means of fostering collaborative learning. Most, but not all, necessary texts are available on Vital Source.

The medical school has negotiated, on your behalf, an online subscription to textbooks required for the Master of Science in Biomedical Sciences program. Thus, students *should not* individually purchase required Vital Source textbooks. Instead, all students are invoiced by the medical school for the purchase of required Vital Source textbooks prior to the start of medical school.
